CV

EMPLOYMENT HISTORY

Consid AB, system developer, 2024 09 – 2024 12
Developed software with C# as main programming language.

Capo AB, system developer, 2021 08 – 2024 05
Developed server software and web services with C# as main programming language.

SMS Teknik AB i Munkedal, system developer, 2011 09 – 2021 06
Developed client and server software and web services with C# as main programming language.

Unemployed 2010 04 – 2011 09
I had an internship as a web developer during this time, at Storm Home in Trollhättan, where I created a website and a web shop in PHP .

Sahlgrenska Universitetssjukhuset, web developer, 2007 01 – 2010 03
My main job was web development in PHP. The project I worked on was a sub-project within Healthcare on the Web (a national project in psychiatry) that focuses on patients within the care queue. This was a good experience that not only gave me a foothold in the job market, but also an insight into what it is like to work in a large organization. I got to work both independently and in teams, which worked very well. The project period ended in March 2010, after the web portal we created was put into use.

EDUCATION

IT-universitet in Göteborg, 2005 08 – 2007 01
After university in Uddevalla, I applied to the University of Gothenburg. There I went Learning, Communication and IT and I took my master's degree on May 8, 2008.

Högskolan Väst (former Högskolan i Trollhättan/Uddevalla), 2002 08 – 2005 06
In the autumn of 2002, I started studying in the Informatics program (formerly the Systems Science program) with psychology as a minor. When I finished in the spring of 2005, I took my bachelor's degree with the major subject Informatics, minor in psychology.

Östrabogymnasiet, Uddevalla, 1999 08 – 2002 06
Three years in the Electricity Program with a focus on data and telecommunications, at the same time read supplementary courses to gain university eligibility.
